Let's Collab (About Me + Contact)

Impact Statement + Why work with me

- Jay's Creative Lab - Creative Strategic Designer in hospitality & experiential experiences
 - Global Hospitality and Creative Design Strategist
 - Show you understand guest flows, service design, operations interface
 - An environment that is emotionally intelligent, understanding human behaviour, supportive, non judgemental and embraces change.
- Brand voice: I understand people, spaces and experience design
 - Grounded
 - Emotionally intelligent
 - Questions
 - Cultural knowledge & empathy
 - Credibility with connections
 - Communicating complex ideas in approachable ways.
- Portfolio that speaks globally - interfaces, experiences and design ideas
 - My work sits at the intersection of systems thinking, storytelling, and human-centered design. I'm deeply committed to accessibility, sustainability, and ethical innovation, with a strong focus on inclusive narratives and future-facing tools.
 - Using a systematic framework to understand your business
 - How to design your business using AI to automate workflows
- I create service design for high-stakes, human-centered, fast-paced systems",
- I'm a pattern thinker who can connect human behavior to systems.
- I see connections where others see chaos.
- Embodied empathy and adaptive learning.
- Design + Strategy + Sales
 - Design from Interaction design program skills
 - Strategy from strategic problem solving skills
 - Sales from hospitality and events

Impact Statement

Jay's Creative Lab

Creative Strategic Designer in Hospitality & Experiential Experiences

I design experiences where people, spaces, and systems connect.

With roots in **hospitality, interaction design, and strategy**, I bring emotional intelligence to every project, blending human-centered insight with technological innovation.

Whether optimizing guest journeys, prototyping ethical AI tools, or crafting interactive storytelling systems, my approach is always grounded in empathy, curiosity, and connection.

Brand Voice Keywords: Grounded • Empathic • Adaptive • Systems Thinker

Why work with me

I'm a **Global Hospitality and Creative Design Strategist** who translates complex ideas into approachable, human experiences.

My work helps teams understand **guest flows, service design, and operations interfaces** — designing environments that are emotionally intelligent, inclusive, and future-ready.

I use **systematic frameworks** to help businesses scale ethically and sustainably, integrating **AI and automation** without losing the human touch.

"I see connections where others see chaos — turning empathy into systems, and systems into stories."

"Designing systems of care, creativity, and connection."

Relevant skills (4-6) (refer to resources)

- Visionary Thinker, Culturally empathic, Undeniable curiosity, Design + Strategy + Sales
- Hospitality & community building
- Data driven design thinking
- Innovation + Automation
- UX research & storytelling
- Culturally Curious
- Accessible & Responsive Design
- Human Centered design
- Systems thinking
- Ethical Innovation
- UX Research & Strategy
- Branding & Marketing in Hospitality
- AI assisted creative workflows

Core Skills

- **Visionary Thinking** – anticipating patterns and designing for what's next
- **Cultural Empathy** – translating diverse perspectives into inclusive design

- **UX Research & Storytelling** – building experiences rooted in data and narrative
- **Hospitality & Community Design** – designing for connection and flow
- **AI & Automation Strategy** – simplifying workflows through intelligent systems
- **Accessible, Ethical Design** – ensuring innovation benefits everyone

Softwares + Technologies (refer to resources)

- Figma + Figjam
- Canva
- Adobe Suite
- Spline (?)
- Framer
- Miro + Whimsical
- Notion + Trello
- GPT 5 + Midjourney + Spatial.io
- Processing + [p5.js](#)
- Hotjar + Google Analytics

Industries of interests (4-6) ??

- Travel & Hospitality
- Community building
- Accessible design
- Immersive Experiences
- Sustainable & Ethical AI
- Humans working with machines
- Sustainability & Ethical Design

Industries

- Travel & Hospitality
- Community Building
- Accessible & Inclusive Design
- Immersive Experiences
- Sustainable & Ethical AI
- Human–Machine Collaboration

Projects with description and label tags (2-4)

1. **Wavemakers**
 - Interactive research workbook for international student well-being (SDG 3: Good Health & Well-Being)
 - UX Research • Service Design • Systems Thinking
2. **Sustainable Sparks**
 -
3. **AI Travel agent management**

- Prototyping human–AI collaboration for sustainable, efficient trip planning
- AI Ethics • Workflow Automation • UX Strategy

4. Peak Pursuits

-

Services (2-4) (refer to resources)

1. UX Design, Research & Strategy (UX/UI Design & Prototyping)

- Crafting accessible, responsive digital interfaces that blend storytelling, usability, and emotion.

2. Service Blueprinting & Guest Journey Mapping

- Visualizing end-to-end customer experiences across digital and in-person touchpoints to identify opportunities for delight and efficiency.

3. AI-Assisted Workflow Design

- Building tools and systems that integrate AI ethically into business and creative processes.

4. Creative Direction for Hospitality Experiences

- Designing branded experiences that align operations, ambience, and guest flow, merging strategy with emotion.

5. Sustainable & Ethical Design Consulting

- Developing experiences that promote environmental awareness and community connection, guided by design ethics and cultural empathy.

6. Design Systems & Brand Experience

- Translating values and culture into cohesive brand experiences — from voice and tone to visual consistency and guest touchpoints.

FAQ

- How can we start working together?
- What is my design process?
- What are some projects that I'm interested in building and working on?

1. Are you open to internships or collaborations?

Yes! I'm currently in my final year of the Interaction Design program at George Brown College and always open to creative collaborations, co-op placements, or freelance projects. I love partnering with teams who value curiosity, culture, and innovation.

2. What kinds of projects are you most interested in?

I'm drawn to projects that explore the intersection of human behavior, systems thinking, and emerging technology — especially in hospitality, sustainability, and AI ethics. If it involves designing for people, purpose, or positive change, I'm in.

3. How do you approach new projects?

My process blends empathy, research, and experimentation. I start by understanding the people and context behind a challenge, then use systems mapping and prototyping to translate insights into actionable design solutions.

4. What's your design philosophy?

I believe design is both strategic and emotional. It's about making people feel seen while solving real problems. My approach is grounded in human-centered thinking, accessibility, and ethical innovation — design should make change feel possible.

5. How do you use AI in your design process?

I use AI as a creative collaborator, not a replacement for human insight. From automating workflows and testing prototypes to generating concept visuals, I integrate AI tools ethically to enhance storytelling, efficiency, and accessibility.

6. What are your plans after graduation?

I plan to expand my portfolio into experience strategy and creative technology, ideally working with global teams in hospitality, sustainable design, or innovation consulting. My goal is to help bridge design, strategy, and emerging tech in meaningful ways.

About Me

Hi, I'm Jaylynn —

a polymathic interaction designer blending curiosity, ethics, and joy into every project.

I design interactive experiences that explore human behavior, emerging technology, and systems of care.

Whether sculpting tangible interfaces or building responsive designs in Figma and Framer, I'm always asking:

"How can we use design to make change feel possible?"

My work sits at the intersection of systems thinking, storytelling, and human-centered design — with a commitment to accessibility, sustainability, and inclusive narratives.

“Growth lives just outside your comfort zone — let’s explore it, together.”

(– Anything is possible, with Kim Possible!)

GBC Sustainability Ambassador -2025

Big Brother & Big Sisters of Toronto Student Mentor -2025

Overall Visual Direction/UI

Vibe: grounded futurism • soft minimalism • organic meets tech

Color palette: neutrals (sand, beige, charcoal) + hints of light teal, blush, sage, or gold

Mood: warm lighting, tactile materials, natural textures mixed with subtle tech cues

You’re telling the story of “humans and systems coexisting beautifully.”

Think: clay meets code, design meets empathy, connection meets innovation.
